

<b>Error #</b>	<b>Error Description</b>
0	No error
1	Data did not all fit in the pipe
-1	Operation cancelled by user
-2	partial success
-99	Invalid command to service
-101	Bad parameter(s) to the Service
-103	Service not installed or enabled
-105	All pipes are busy
-107	Error reading pipe
-111	Service disabled
-115	Access denied to service
-117	Buffer was too small to hold data
-121	Copy Engine failed to start
-131	No such AIP.ini configuration parameter
-133	Invalid configuration value
-135	Can't write to AIP.ini
-137	AIP.ini configuration parameter is empty
-141	No matching schedule found
-150	Windows update is running
-151	USB HDD destination unplugged
-161	Task not found
-162	Task is pending
-201	No drive found
-203	Removable drive found
-205	Unsupported drive found
-211	No volume mounted on device
-213	Device has volume mounted
-215	Volume already mounted
-217	Volume in-use - cannot lock
-231	Error getting or setting drive partition
-233	Error no partition in drive layout
-235	Error no extended partition in drive layout
-237	Error no logical partitions in drive layout
-239	Error delete a system partition.
-241	Many partitions on a disk
-243	Many disks on a system
-245	Invalid disk info
-301	Invalid Profile
-303	Profile file not found
-305	Profile string too long
-307	Can't write to profile
-309	Invalid profile name
-311	Could not start VSS

-312	snapshot not found
-321	Error running script
-330	launch a program but failed
-331	(unsupported client version)
-340	Do replication error
-341	No enough free space on target
-401	Image file not found
-403	Path to image file not found
-405	Access denied to image file
-407	Image chunk not found
-409	Image file version unsupported
-411	Bad magic in image file - probably not an image file
-413	Image corrupt or truncated
-415	Image password is not correct
-417	Image name is invalid
-419	Device not found. Is aip.sys installed?
-421	Mount attempted on existing drive
-423	Mount failed
-425	All devices in use
-427	Restore target volume not found
-429	Restore source volume in image not found
-431	Restore target volume too small
-433	Restore target volume wrong size
-435	The base image of a differential has been modified
-437	The image could not be mounted writable because it has dependent images
-438	The image is used
-439	A dependent incremental image is missing or inaccessible
-441	Could not assign a drive letter to a volume
-443	Error creating new target volume
-445	Cannot use Restore Disk to restore a Dynamic Disk
-447	Source volume must be NTFS to restore to a Dynamic Disk
-449	The size of volume has changed since base image was created
-451	The source for an Incremental or Differential image does not match the base image.
-452	\$AIPMAP missing.
-455	Create source volume or disk in computer not found
-456	Unsupported image filesystem
-457	The remote path is not a directory
-459	Connection to remote path refused
-461	directory not empty
-463	copy process failed
-465	copy folder to sub folder(dead loop)
-501	Schedule file not found
-503	Invalid schedule name
-505	Schedule corrupt

-507	Can't write to schedule
-509	Invalid schedule parameter
-521	Dedup error
-551	File not found
-552	file path name too long
-553	No open file
-555	File already open
-557	End of file
-559	Error writing to file
-571	Socket error
-572	Communication data from wire is not as suppose
-573	wrong password for remote control
-574	(remote user priviledge)
-575	communication data from wire is not as suppose
-581	Error connecting to remote computer
-583	Error logging on a remote user
-585	User is not an admin of remote computer
-587	WebDAV error
-588	FTP error
-591	Error logging on as network user
-593	Password is incorrect
-594	Error in response from the HTTP server
-601	Sector Tracking driver not installed
-603	Source volume is not being tracked
-605	Tracking was started using a different base image
-611	E-mail not configured
-612	E-mail Server return an error
-701	(Pipeline Error)
-702	Disk full
-704	missing the file 'rfehelper.exe'
-705	invalid username&password for local pc
-706	empty username for remote pc
-707	invalid username&password for remote pc
-708	Target path is not directory
-709	Connection failed
-710	Same Name error for file/folder copy and rename
-711	Connection timeout
-712	Connection refused
-713	Path not found
-714	Open directory failed
-720	MySQL is not running
-730	Error connecting to MySQL

**-740 thru -750 are reserved for Auto Update**

-740	No new updates are available
-741	Error occurred in the HTTP/HTTPS request
-741	HTTP lib is not initialized
-750	(AU None)
-800	Virtual disk partition layout couldn't be read.
-901	No Protection
-902	License or evaluation term has expired
-903	License is already activated.
-904	Serial number or activation key is invalid.
-905	The activation is success.
-906	License term has expired for the IT Pro edition
-990	Time out error
-999	Some unexpected Windows error
-910	Common license error
-911	Product key missing in registry
-912	Product key tampered in registry
-913	Product key not support
-914	Invalid license key
-915	Error during run online activation
-920	Drive to map is invalid or in use
-930	Get Adapters info failed
-931	Get Adapters info failed
-932	Set ip failed
-933	Set dns failed
-934	IP already used
-935	Write registry failed
-936	Release IP failed
-937	Renew IP failed
-938	Load Adapter interface info failed
-950	Dll not found
-951	Function in Dll not found

**-88880001 to -88880199 are reserved for push install**

-88880001	(No Sharefolder)
-88880002	(Command Line)
-88880003	(Open Scm)
-88880004	(Inst Service)
-88880005	(Start Service)
-88880006	(Copy File)
-88880007	(Pipe Init)
-88880008	(Pipe Write)
-88880009	(Pass Uname)
